RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (DIPPII), issued Consolidated FDI Policy Circular of 2015 ("FDI Policy 2015"), which with effect from May 12, 2015, consolidates and supersedes all previous press notes, press releases and clarifications on FDI Policy issued by the DIPP that were in force and effect as on May 11, 2015. However, press note 4 of (2015 Series), dated April 24, 2015, regarding policy on foreign investment in pension sector, will remain effective. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Policy 2015 will be valid until the DIPP issues an updated circular. The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the FDI Policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI. As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.

Accordingly, the equity shares are being offered and sold only outside the United States of America in an offshore transaction in reliance upon Regulation S under the US Securities Act and the applicable laws of the jurisdiction where those offers and sale occur.

The above information is given for the benefit of the Applicants. Currently, a significant portion of our revenue is accounted for by sales to the government sector and sales effected through our top 10 dealers. The percentage of sales derived from our Company’s top 10 govt customers and sales effected through top 10 dealers aggregated about 29%, 52% and 56% of our total sales for FYs 2014, 2015 and 2016 respectively. While we are constantly working to increase our customer base by following new marketing strategies and developing new products and entering newer markets so as to enable us to reduce dependence on limited number of customers, there is no assurance that we will be able to broaden our customer base or sales pattern in a particular time frame in future. Our business or results of operations could be adversely affected by a reduction in demand or change in preference for our product or cessation of our relationship with any such major customers / dealers.

- 3. Our Company is presently enjoying certain fiscal incentives such as excise duty exemption based on the location of our manufacturing unit at Parwanoo, Himachal Pradesh. The said fiscal incentives are due to expire in March 2017. Our inability to find an alternate location conferring such fiscal incentives on our manufacturing unit may have a material and adverse effect on our business and results of operations.**

Fiscal Incentives like excise duty exemptions and income tax rebates are presently available to us due to location of our manufacturing facility at Parwanoo, Himachal Pradesh. These are due to expire in March 2017. We are looking for alternative means of retaining the fiscal incentives by relocating our operations within Parwanoo or relocating to any other territory offering similar fiscal incentives. In this regard, we have, in February 2016, taken over an existing unit in Parwanoo which, we believe, has all necessary statutory registrations and eligible for availing fiscal benefits if we relocate our manufacturing operations there. However, if such is not the case or we are unable to find such an alternate location in a timely manner and the fiscal incentives are not available to us in future, it may impact our sales and also our margins since we may not be able to pass on the increase in cost of our products to the customers in full. However, this can be offset to some extent through production cost rationalization and introduction of value added products for higher sales realization.

4. We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions.

The details of Cash flows of our Company are as follows:

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For more information, regarding Cash flows, please refer Annexure 03 in Section V titled "FINANCIAL INFORMATION OF THE COMPANY" beginning on page 147 of this Prospectus.

5. Our funding requirements and deployment of the Proceeds of the Issue are based on management estimates and have not been independently appraised.

We intend to use the proceeds of the Issue for purposes described in the section "Objects of the Issue" beginning on page 65 of this Prospectus. As disclosed in the said section, our funding requirements and the deployment of the Net Proceeds of the Fresh Issue are based on management estimates and our current business plans; and such fund requirements and intended use of proceeds have not been appraised by any bank or financial institution. Because of the competitive and dynamic nature of the businesses that we operate in, we may need to revise our expenditure and fund requirements due to changes in the cost structure, changes in estimates on receipt of actual quotations, exchange rate fluctuations and external factors, which may not be within the control of our management. In the event of an increase in expenditure and fund requirements, we intend to try and meet these increased requirements through our internal accruals and additional debt or equity arrangements. This may entail rescheduling or revising the planned expenditure and fund requirements and increasing or decreasing the expenditure for a particular purpose at the discretion of our Board.

6. There is no monitoring agency appointed by our Company and the deployment of funds is at the discretion of our Management and our Board of Directors, though it shall be monitored by our Audit Committee.

As per SEBI (ICDR) Regulations, 2009, as amended, appointment of monitoring agency is required only for Issue size above ₹ 500 crores. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds and it will be at the discretion of our Management. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI Listing Regulations and any material deviation will be made only in accordance with applicable laws and SEBI Regulations.

- 7. We have not yet placed orders for 100% of plant & machinery and other equipment requirements as specified in the Objects of the Issue. Any delay in procurement of plant & machinery, equipment, etc. may delay the implementation schedule which may also lead to increase in prices of these equipments, further affecting our costs, revenue and profitability.**

We propose to purchase plant & machinery worth ₹ 945 lacs from the proceeds of this Issue as specified in the Objects of the Issue. We have neither placed orders for any part of the plant & machinery and other equipments nor have procured quotations for them; the estimates having been based on the knowledge and experience of our management in this field. Any delay in procurement of plant & machinery, equipment, etc may delay the implementation schedule. We may also be subject to risks of cost escalation on account of inflation in the price of plant & machinery and other equipments that we require. Hence our project could face time and cost over-run which could have an adverse effect on the operations of our Company.

- 8. Delay in completion of the Issue or any shortfall in raising the amount envisaged coupled with absence of any alternate source of funds would adversely affect our growth plans, operations and financial performance**

The funds that we receive would be utilized for the objects of the Issue as has been stated in the section, "Objects of the Issue" on page 65 of the Prospectus. Any delay in completion of the Issue or any shortfall in raising the amount envisaged will adversely affect our ability to pursue the Objects of the Issue especially since we have not identified any alternate source of funds required for the same. Hence, this would result in adverse effect on our growth plans, operations and financial performance.

- 9. Our Company has not made provision for Gratuity Payment as required under The Payment of Gratuity Act 1972. Our company has not complied with 'AS-15 - Employee Benefits' as issued by ICAI.**

The Company has completed five years from the date of Incorporation and the Payment of Gratuity Act, 1972 is applicable. We have not made provision for Gratuity Payment as required under The Payment of Gratuity Act 1972. The compliance of Accounting Standard-15 — Employee Benefits is mandatory for Companies. We have not complied with the same. The effect of the non-compliance is not quantifiable.

- 10. Our Company had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies in the past and may continue to do so in future as well which may adversely affect our competitive edge and bargaining power and may involve a potential conflict of interest.**

Our Company had entered into various transactions with our Promoters, Promoter Group, Directors and their Relatives and Group Companies for job work, granting of loans & advances, letting out of

our premises to group entities etc. Such related party transactions were entered into by our Company due to proximity with the related parties and the ability of quick execution of deals. While our Company believes that all such related party transactions have been undertaken at arm's length basis, it is difficult to determine whether we could have been able to obtain better and more favourable terms if such transactions were entered with unrelated parties. Our Company may enter into such transactions with related parties in future as well. We cannot assure that in such event there would be no adverse effect on the financial results of our Company. For details please refer to Annexure 30 on Related Party Transactions of the Auditor's Report under Section titled "Financial Information of the Company" beginning on page 147 of this Prospectus.

- 11. We have not entered into any long term supply agreement for procuring major components required for manufacturing of our products. Also, volatility in the prices and non availability of critical components may have an adverse impact on our business.**

The major raw materials and components required for our products are metal frames, ABS granules, transformer, SMF battery, load cells etc. Our Company has not entered into any long-term contracts with our suppliers of various components and parts used in manufacture of our products. In the absence of any long-term arrangement with our suppliers and in event of any unexpected price fluctuations or, disruption in the supply of various components in terms of requisite quantities, defects in quality or any factors beyond our control, our production schedule may also be adversely affected. In the event when our Company fails to secure sufficient quantities of required components and parts from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

- 12. Our financial condition could be affected if any of the major customers of the Company do not honour the payment terms, or commits delays or defaults in the outstanding payments.**

Our sales to Govt. Departments and schemes sponsored by Government has seen a rise in the recent past. Payments from such customers are ordinarily received in about 120 days. Any substantial delay in receipt of payments from our major customers can adversely impact our liquidity position besides enhancing our financing costs. Also, there is no guarantee that all of our customers will honor their outstanding payment commitments on time. Such events of delayed or non-payment can adversely affect our financial performance and results of operations..

- 13. Our Company has availed financial facility in the nature of Cash Credit from our bankers, which includes several conditions and restrictive covenants. As such, certain actions on part of our Company may require prior written approval of the Banker.**

We have availed credit facilities in the nature of Cash Credit from our bankers, HDFC Bank Limited. The sanction letter/ agreement contain certain restrictive covenants, which among other things require us to obtain their written permission for various actions including undertaking an expansion or diversification programme. These covenants may also under certain circumstances constrain our company's ability to take certain decisions in a timely manner which may have an adverse effect on the functioning and fund-raising plans of our Company.

- 14. Strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees/workmen in future could adversely affect our business and results of operations.**

Presently our Company has 286 full-time employees and 130 contracted labour including workers at our manufacturing unit and with an increase in our production capacities or execution of any expansion plans in future we expect increase in such number of employees. Historically, we have enjoyed a good relationship with our employees and have not experienced any lockouts, strikes, or any disruptions of any sort due to labour unrest. However there can be no assurance that we may not experience any disruptions in our operations in future as well. In case of disputes or other problems with our work force such as strikes, work stoppages or increased wage demands, our business, financial conditions and results of operations may be materially and adversely affected.

- 15. We are dependent on our Managing Director, Mr. Rajesh Raghunath Bhatwal for the conduct and growth of business of our Company, given his expertise in strategic business and investment decisions. His disassociation from our Company in future may adversely affect our business and our growth prospects.**

Our Managing Director, Mr. Rajesh Raghunath Bhatwal is also its Promoter. He has guided the Company since its inception and has been instrumental in the growth of our Company. As Managing Director of the Company, Mr. Rajesh Bhatwal has been overseeing all aspects of our Company's day-to-day operations. We rely significantly on Mr. Rajesh Bhatwal for his expertise in strategic business, financial and investment decisions.. His disassociation from our Company may adversely affect our business, results of operations and could seriously impair our ability to continue to manage and expand the business.

- 16. We are dependent on our management team for our success. If we are unable to retain the services of our management team, particularly key managerial personnel, our business and our operating results could be adversely impacted.**

The success of our business largely depends on the continued services and efficiency of our management team, particularly the key managerial personnel. As on date, our Company has limited human resources to oversee the specific organizational functions assigned to them. Their efficient performance enables our Company to carry out the business activities effectively. A limited human resource results in heavy reliability of our business on such key managerial personnel of the Company. The loss of our management team or key managerial personnel by way of disassociation or otherwise may materially and adversely impact our business, results of operations and financial condition. The failure or inability of our Company to retain and manage its key human resources would adversely affect our ability to implement new projects or execute any expansion plans in future.

- 17. Our products adhere to strict quality control requirements because of which we have gained the trust and confidence of our customers and our inability to maintain such quality standards on consistent basis in future could adversely impact our business, results of operations and financial condition**

Our Company is currently engaged in the manufacture and sale of wide range of Electronic Weighing Scales and Systems, Currency Counting Machines and Electronic Fare Meters that adhere to high quality and precision. Success of our business depends upon quality of our products. We have gained the trust and confidence of our customers due to the emphasis placed by us on the quality of products manufactured by us. Any rapid change in our customers' expectations on account of changes in technology or introduction of new product or any other reason and failure on our part to comply with the design specifications of our customers or meet their quality expectations in future may lead to cancellation of the supply orders placed by our customers or reduction in the volume of orders given to us. This could adversely affect our business, results of operations and financial condition of the Company.

18. Our insurance coverage may not adequately protect us against certain operating risks and this may have an adverse effect on the results of our business operations.

We are insured for a number of the risks associated with our manufacturing business, through appropriate insurance policies. We believe we have got our assets adequately insured; however there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, to cover all material losses. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our business and results of operations could be adversely affected. We may also be subject to claims resulting from defects in the design or quality of our products. Our insurance may not be effective or adequate to cover all such risks. Failure to effectively cover ourselves against the associated risks for any of these reasons including other unforeseen circumstances could expose us to substantial costs and potentially lead to material losses.

19. We do not own the premises on which our present manufacturing unit is located as also a few of the premises from where we are currently operating and the same have been taken on lease. Any failure on our part to meet the terms of those lease agreements, arrangements could jeopardise our interest severely.

We do not own our manufacturing unit (situated at Plot No. 11-A, Sector - 2, Parwanoo, Tehsil Kasauli, Dist Solan, Himachal Pradesh), and the same is taken on lease which expires in December 2017. We also have our branch offices in Raipur, Bilaspur and Raigarh in Chattisgarh and Balangir, Jeypore and Sambalpur in Odisha which are located on leased premises.

If any of the owners of these leased premises do not renew the agreements under which we occupy the premises or we are unable to find satisfactory alternate arrangements to locate our manufacturing unit and/or branches upon expiry/non-renewal of such lease agreements, we may suffer a disruption in our operations which might adversely affect our business and results of operations

20. Our Promoter, Director have given personal guarantees in relation to Credit facility (fund and non-fund based) for credit facilities provided to our Company by HDFC Bank Ltd. In the event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoter's / Directors' ability to manage the affairs of our Company and consequently impact our business, prospects, financial condition and results of operations.

Our Company has been sanctioned Credit facilities (fund based and non-fund based) of ₹ 2,250 Lacs from HDFC Bank Ltd., to our Company. Terms and conditions of the said facility stipulate that the facility shall be secured by a personal guarantee of our Promoter, Directors. In event of default on the debt obligations, the personal guarantees may be invoked thereby adversely affecting our Promoter's ability to manage the affairs of our Company and consequently may impact our business, prospects, financial condition and results of operations. For further details in relation to above borrowings please refer section titled "Financial Information" beginning at page no. 147 of this Prospectus.

21. We require working capital for our smooth day-to-day operations of business and any discontinuance or our inability to arrange adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

Over past few years, we have been successfully executing good number of orders from Govt. Institutions and Govt. sponsored institutions. In view of the general terms of payment by such govt.

institutions in respect of supplies to them, there has been a higher requirement of funds for working capital. Presently, we have sanction from HDFC Bank Ltd., for fund-based and non-fund based working capital facilities amounting to ₹ 2,250 Lacs, which we feel is sufficient to meet our present requirements. However, in future if there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from banks/other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

22. Our business is subject to various operating risks at our factory, the occurrence of which can affect our results of operations and consequently, financial condition of our Company

Our business operations are subject to operating risks, such as breakdown or failure of equipments used at our factory, interruption in power supply, shortage of consumables, performance below expected levels of output or efficiency, natural disasters, obsolescence, labour disputes, industrial accidents, our inability to respond to technological advancements and emerging industry standards and practices along with the need to comply with the directives of relevant government authorities. The occurrence of these risks, if any, could significantly affect our operating results, and the slowdown / shutdown of business operations may have a material adverse affect on our business operations and financial conditions

23. Our Company is required to obtain several statutory and regulatory permits, licenses and approvals to conduct our business. For the proposed introduction of new products and setting up of new manufacturing unit, as specified in the Objects of the Issue, we may require several approvals from different Government / Regulatory authorities. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-receipt / non-timely receipt / Non-renewal of the said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition

Our Company requires certain statutory and regulatory registrations, licenses, permits and approvals for our business. For details, please see chapters titled "Key Industry Regulations and Policies" and "Government and Other Approvals" at pages 117 and 185 respectively of the Prospectus. For our proposed business activities of introducing new products and setting up of new manufacturing unit, as specified in Objects of the Issue, we may require several approvals from different Government and Regulatory authorities. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on our business, results of operations and financial condition. Further, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all.

24. Dependency on our Branches and Dealers for business operations

Our products are sold and serviced through our branches and a network of authorized dealers / service centres across our domestic market which account for about 50% of Sales. We monitor the performance of our branches and dealers and provide them with support to enable them to perform to our expectations. There can be no assurance, however, that these expectations will be met. Any under-performance by our branches or dealers could materially and adversely affect our sales, financial condition and results of operations.

25. We require approvals under Legal Metrology Act, 2009 and Legal Metrology (Approval of Models) Rules, 2011 in the ordinary course of business for products

All our products are subject to requisite approvals to be obtained from the Department of Legal Metrology under the Legal Metrology Act, 2009 and Legal Metrology (Approval of Models) Rules, 2011. We already have the necessary approvals for all our existing models. However, all the new models that would be manufactured by us will be subject to approvals from the Legal Metrology Department, Government of India.

26. Our Promoters and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration

Our Promoters and Directors may be deemed to be interested in our Company to the extent of the Equity Shares held by them or their relatives, and benefits deriving from their positions held in our Company, if any. Our Promoters and Directors may also be deemed to be interested in certain transactions entered into between our Company and themselves or between our Company and our Group Entities. For further details, please refer to the chapters titled "Our Business" and "Our Promoters", beginning on page 96 and 140 respectively and the Annexure 30 titled "Related Party Transactions" on page 171 of the Prospectus

Risks Related to Our Equity Shares and Equity Share Holders

27. Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Issue, which will allow them to exercise significant control over us and influence the outcome of matters submitted to shareholders for approval.

As on date of the Prospectus, our Promoter and the members of our Promoter Group hold 90% of the issued equity share capital of our Company. Following the initial public offer made through the Prospectus, our Promoter and the members of our Promoter Group will hold 65.85% of the equity share capital of our Company. Thus, a significant control of our Company will be at the discretion of our Promoter and members of the Promoter Group. As a result, our Promoter and members of our Promoter Group will have the ability to control our business, including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election or termination of appointment of our officers and directors. This control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it's in our Company's best interest. In addition, for so long as our Promoter and the members of our Promoter Group continue to exercise significant control over our Company they may influence the material policies of our Company in a manner that could conflict with the interests of our other shareholders. Our Promoter and the members of our Promoter Group may have interests that are adverse to the interests of our other shareholders and may take positions with which our other shareholders do not agree.

28. Our Company may not regularly be in a position to distribute dividends in future and the same will be dependent upon the future earnings, cash flows, working capital requirements, capital expenditures and financial condition.

Our Company's ability to declare dividend in future, if any, will depend on our future earnings, cash flows, financial condition, working capital requirements, capital expenditures, applicable laws in this regard and such other factors. There can be no assurance that we will pay dividends in future. Our Company may instead want to retain all the earnings to facilitate any major expansion or business development plans and, therefore, refrain from declaring any dividends on its Equity Shares. Also, if our Company suffers losses in any particular year, our Company may not be in a position to declare dividends.

29. Any future issuance of Equity Shares may dilute your shareholdings, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.

Any future equity issuances by our Company may lead to the dilution of investors' shareholding in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

30. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

EXTERNAL RISK FACTORS

31. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled "Key Industry Regulations and Policies" beginning on page 117 of the Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations, including changes in the fiscal incentive

structure which the company enjoys at present. There can be no assurance that our Company will succeed in adapting to such regulatory changes or in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

32. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. The extent and severity of these natural disasters and pandemics determines their impact on these economies. Our operations and financial results and the market price and liquidity of our equity shares may be affected by social and ethnic instability and other political and economic developments affecting India.

33. Terrorist attacks / war / conflicts where we operate or where our clients and Customers are located could adversely affect the financial markets and adversely affect our business.

Terrorist attacks and other acts of violence, war or conflicts, particularly those involving India, or another part of the world where we operate or may operate or our client may operate, may adversely affect Indian and worldwide financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has from time to time experienced social and civil unrest, terrorist attacks and hostilities with neighbouring countries. Such social or civil unrest or hostilities could disrupt communications and adversely affect the economy of such countries. Such events could also create a perception that investments in companies such as ours involve a higher degree of risk than investments in companies in other countries. This, in turn, could have material adverse effect on the market for securities of such companies, including our Equity Shares. The consequences of any armed conflicts are unpredictable, and we may not be able to foresee events that could have an adverse effect on our business.

34. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing to fund our growth on favourable terms or at all.

35. Investing in securities that carry emerging market risks can be affected generally by volatility in the emerging markets.

The markets for securities bearing emerging market risks, such as risks relating to India, are, to varying degrees, influenced by economic and securities market conditions in other emerging market countries. Although economic conditions differ in each country, investors' reactions to developments in one country may affect securities of issuers in other countries, including India. Accordingly, the price and liquidity of the Equity Shares may be subject to significant fluctuations, which may not necessarily be directly or indirectly related to our financial performance.

36. Companies operating in India are subject to a variety of central and state government taxes and surcharges. Any increases tax rates could adversely affect our business and results of operations.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, value added tax, turnover tax, service tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time. For example, a new direct tax code as well as new goods and services tax regime is expected to be introduced in the future, and the scope of the service tax has been enlarged. The statutory corporate income tax in India is 30% (exclusive of surcharge and Education cess). The central or state government may in the future increase the corporate income tax it imposes. Any such future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. Additional tax exposure could adversely affect our business and results of operations.

Government and Institutional Segment

Electronic weighing scales have an important application in the government programs concerning child development and welfare generally administered by Ministry of Women and Child Development (“MoWCD”). At the central level, out of budgetary allocation to the Ministry, a major amount is spent on ICDS program.

ICDS

Integrated Child Development Services (ICDS) is a welfare programme by Government of India which provides food, pre-school education, and primary healthcare to children under 6 years of age and their mothers. These services are provided from Anganwadi Centres (AWCs”) established mainly in rural areas and staffed with frontline workers.

Objectives

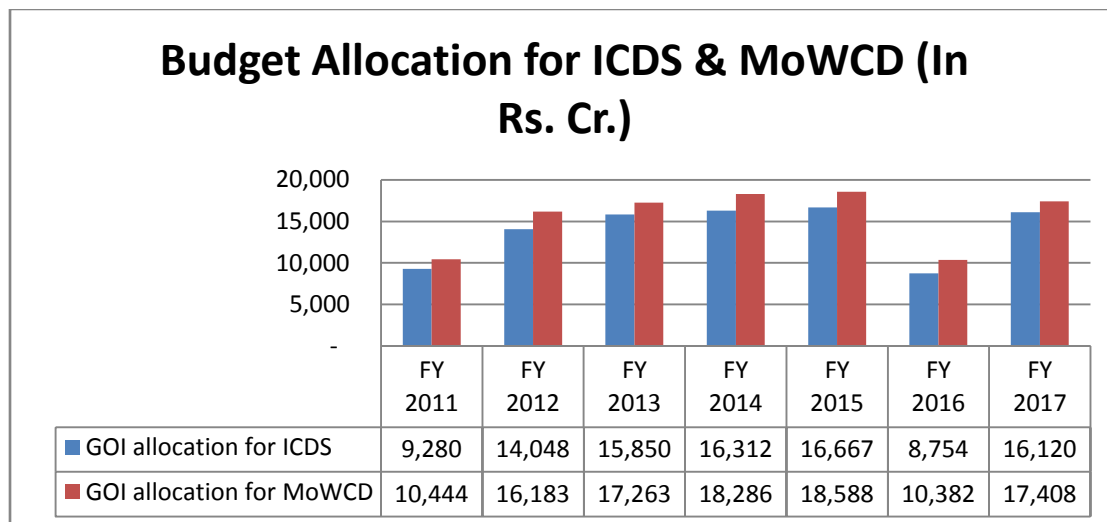

ICDS is designed to provide basic education and health services to children below 6 years of age, their mothers and to pregnant women. These objectives are achieved through following services;

1. Supplementary Nutrition
2. Non formal preschool education
3. Nutrition and Health Education
4. Immunizations
5. Health Check Ups
6. Referral Services

Budget Highlights - Government of India

As per the press release by MoWCD dated February 29 2016, total budget allocation for Financial year 2016-17 stands at ₹ 17,408 Cr. of which ₹ 16,120 Cr. were allocated to ICDS. A brief snapshot of the budget allocated for various financial years is attached below:

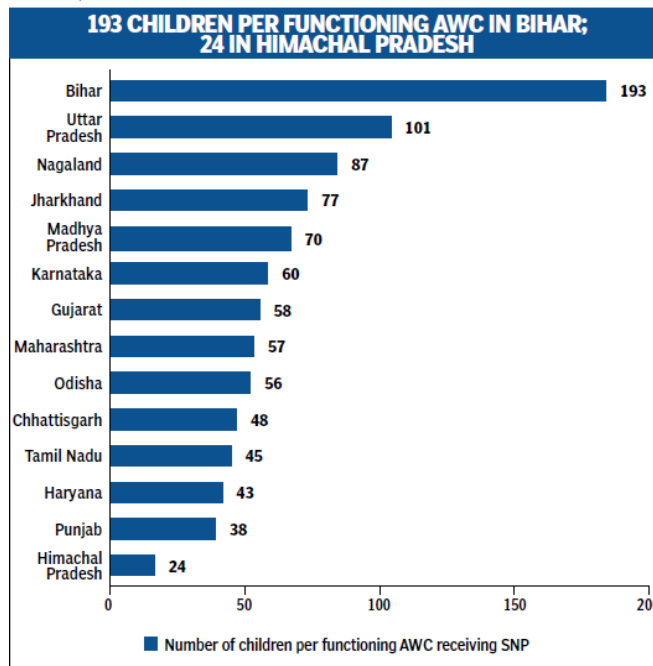

Source: accountabilityindia.in/sites/default/files/icds_2015.pdf & Budget Speech 2016-17

Although the budget allocated for ICDS for FY 2015-16 was only ₹ 8,754 crores, actual funds released for ICDS during FY 2015-16 stood at ₹ 15,439 Cr. as per Press Release dated April 28, 2016 by MoWCD.

Aanganwadis in India

Anganwadi is the first point of service delivery for health, nutrition and early learning for children at the village level. As per press release by Ministry of Women and Child Development dated May 07, 2015, there were 13.42 Lakh operational Aanganwadis in India as on December 31, 2014. These Aanganwadis include 1,87,997 in Uttar Pradesh, 1,14,434 in West Bengal, 1,08,010 in Maharashtra, 91,677 in Bihar, 71,140 in Odisha and 64,518 in Karnataka among others.

There has been significant increase in the percentage of operational Anganwadi centres from 10.4 Lakh in FY 2010 to 13.42 lakh as in FY 2014. Following snapshot gives us a brief idea of average no. of children per aanganwadi centre in India;

Major Challenge faced by Aanganwadis

- Non-use of electronic weighing scale
- Lack of appropriate and adequate supplementary nutrition
- Delayed commencement of complementary feeding
- Referral to nutrition centres
- Ineffective communication by aanganwadi workers regarding under-nutrition and measures to overcome this
- Major gaps in Health Services:
 - Lack of regular health checkups of children
 - Inadequate referral for illness

Child Growth Monitoring Systems (CGMS)

Growth Monitoring (GM) is the process of following the growth rate of a child in comparison to a standard by periodic, frequent anthropometric measurements in order to assess growth adequacy and identify faltering early.

It is a measurement of a child to determine levels of malnutrition for a nutrition surveillance program; or for periodic nutrition assessment; or to screen a population to select or determine eligibility of children for food supplementation, therapeutic feeding, or other services.

Electronic Weighing Scales is proving effective because of following features;

1. Measuring actual weight.
2. Storing the weights in periodic records with name, time and date.
3. Plotting these weights on Growth Charts
4. Analyzing the nature of curves based on their slope.
5. Devising a plan to act according to the curve traced.
6. Easy to use and local language keyboard

Source: http://www.manoffgroup.com/documents/GMP_UNICEF_Nov_1608.pdf

Outcome

The primary objective of ICDS is to reduce the nutrition gap among children between the age 0 to 6 years and pregnant and lactating mothers. This is being achieved by use of electronic weighing scales that are also referred as Child Growth Monitoring Systems. AWC workers are being provided with manuals to use these systems effectively and efficiently. This has resulted in decrease in malnutrition level.

General desirable features of CGMS machines used at Aanganwadis;

1. It should store data of minimum 500 Children.
2. It should give result of child comprising of all three growth charts published by World Health Organization, namely underweight, stunting and wasting.
3. USB Port to transfer data into other portable drives.
4. Equipped with large and sturdy size of ABS Bowl which can accommodate children ageing from 0 to 72 months.
5. Detachable charger for ease of use.
6. Easy to read bright LED display.
7. Equipped with Real time clock.
8. User friendly local language keyboard.

Demand Prospects

As mentioned above, AWCs lack proper measures to weigh infants and children. Government aims to replace all the manual weighing scales with the electronic weighing scales (Child Growth Monitoring Systems). With Aanganwadis being set up in small villages and towns, this will lead to rise in no. of Aanganwadis and generation of good demand for electronic weighing scales.

There are 13.42 Lakh Aanganwadis as of December 2014 in India. As per the general requirement mentioned by the Government of India, there is a requirement of replacing approx. 15% machines per annum being used by Aanganwadis.

Considering a case where minimum 2 machines are required per Anganwadi and approximate sale price of each machine is at ₹ 5,000, an estimation of demand generated can be computed as follows:

Particulars	Amount (₹ in lakhs)
Aanganwadis as of December 31, 2014 (no. in lakhs)	13.42*
Average machines used per Anganwadi	2
Total machines being used (no. in lakhs)	26.84
Replacement Criteria @ 15% (no. in lakhs)	4.03
Offer Price @ ₹ 5,000/-	5,000
Total potential demand generated per annum	20,150

**Data related to Aanganwadis is as of December 31, 2014. Due to rising population, government's thrust on increase the health quotient of the population and to reduce load per Anganwadi in certain states, the No. of Aanganwadis are expected to increase every year. With increase in no. of Aanganwadis, demand arising from them is also expected to increase.*

Nitiraj Engineers Limited is already supplying machines to various state governments under CGMS program. These machines have advanced technology support in form of data collection, plotting, MIS and dissemination. With the help of technology the task of record keeping, plotting, data management and reporting can be handled by the weighing machine systems itself. This provides the field staff and supervisory staff to focus on actual action points to achieve objectives of CGMS and ICDS rather than spending time on data management. We expect the demand of this segment for our Company to sustain and grow in the coming years.

(B) **Setting up new manufacturing Unit (₹ 575 lakhs)**

Our existing Unit: Presently our existing manufacturing operations are conducted from our Parwanoo unit located on 10,000 Sq. Feet of built-up area at Plot No. 11-A, Sector - 2, Parwanoo, Tehsil Kasauli, Dist Solan, Himachal Pradesh. The said factory premises have been acquired on lease which is valid upto December 31, 2017.

New Manufacturing Unit: We propose to set up a new manufacturing unit where requisite facilities would be installed for manufacturing the new products / models envisaged above as well some of our existing products. We have not yet finalised the location for setting up this new unit but have broadly shortlisted Parwanoo, Assam/Meghalaya and Silvassa.

In Silvassa, we continue to have our own factory premises at Tirupati Industrial Estate, Village Amli, Silvasa, Dadra & Nagar Haveli (UT) from where our manufacturing operations were conducted till 2004. Thereafter we discontinued manufacturing operations in Silvassa and moved our manufacturing operations over to Parwanoo.

Having shortlisted the likely locations, we propose to locate the new manufacturing facilities in rented premises initially for about 5 years, to avoid huge investments in land and building and also save on time to set up the unit. Our management has conducted preliminary study of these locations and assessed the availability of ready-to-use factory premises on rental basis in all these locations. As per our assessment, all these locations have desired infrastructure facilities, such as water, power, accessibility to markets both for procurement of raw materials/components and for sale of finished products, skilled manpower etc. In view of this, our management is satisfied about locating our proposed new manufacturing unit in any of these locations and also confident of the ability to identify and finalise appropriate premises on rental basis within a short period of time.

The need for setting up the new unit is to cater to envisaged growth in business. The existing Unit at Parwanoo is working at more than 100% efficiency. Considering the consistent increase in demand for our products and the new products / new models we are proposing to introduce, we foresee a clear requirement for additional manufacturing facility.

In this regard, we have also by an agreement dated February 29, 2016 agreed to take over all the rights, title and interest of the Parwanoo Unit of M/s Aaress Enterprises located at Khasra No. 62, Village Gumma, Sec-1, Parwanoo, Himachal Pradesh, alongwith machineries, furniture and fixtures and all benefits of whatsoever nature, agreements, approvals, registrations under various Govt./ Non Govt. Departments/ institutions etc., concessions, rights and benefits, permits, powers of every kind, nature and description whatsoever, for a consideration of Rs. 20 lakhs. We propose to shift our existing manufacturing operations to these premises subject to necessary approvals, if any, and also possibly locate some of our proposed new manufacturing facilities there.

Our promoters have been in this business since 1994 and are well conversant with the procedures and regulatory permissions required for setting up such a manufacturing unit in different parts of the Country.

GOVERNMENT AND INSTITUTIONAL SEGMENT

Electronic weighing scales have an important application in the government programs concerning child development and welfare generally administered by Ministry of Women and Child Development (“ MoWCD”). At the central level, out of budgetary allocation to the Ministry, a major amount is spent on ICDS program.

ICDS

Integrated Child Development Services (ICDS) is a welfare programme by Government of India which provides food, pre-school education, and primary healthcare to children under 6 years of age and their mothers. These services are provided from Aanganwadi Centres (AWCs”) established mainly in rural areas and staffed with frontline workers.

Objectives

ICDS is designed to provide basic education and health services to children below 6 years of age, their mothers and to pregnant women. These objectives are achieved through following services;

1. Supplementary Nutrition
2. Non formal preschool education
3. Nutrition and Health Education
4. Immunizations
5. Health Check-up
6. Referral Services

Cost Share

ICDS is a centrally sponsored scheme implemented by State Governments and Union Territories. Until FY 2006, Government of India provided 100% financial assistance for inputs other than Supplementary Nutrition Programme (SNP) which was funded entirely through State Budgets. The funding pattern was modified in FY 2010 to 50:50 ratio except for North Eastern states which have 90:10 ratio. Under recently approved Strengthened and restructured ICDS Scheme, the cost ratio for some existing and new components have been kept at 90:10 and 75:25 respectively.

Budget Highlights - Government of India

As per the press release by MoWCD dated February 29 2016, total budget allocation for Financial year 2016-17 stands at ₹ 17,408 Cr. of which ₹ 16,120 Cr. were allocated to ICDS. A brief snapshot of the budget allocated for various financial years is attached below:

Source: accountabilityindia.in/sites/default/files/icds_2015.pdf & Budget Speech 2016-17

Although the budget allocated for ICDS for FY 2015-16 was only ₹ 8,754 crores, actual funds released for ICDS during FY 2015-16 stood at ₹ 15,439 Cr. as per Press Release dated April 28, 2016 by MoWCD.

Aanganwadi and ICDS

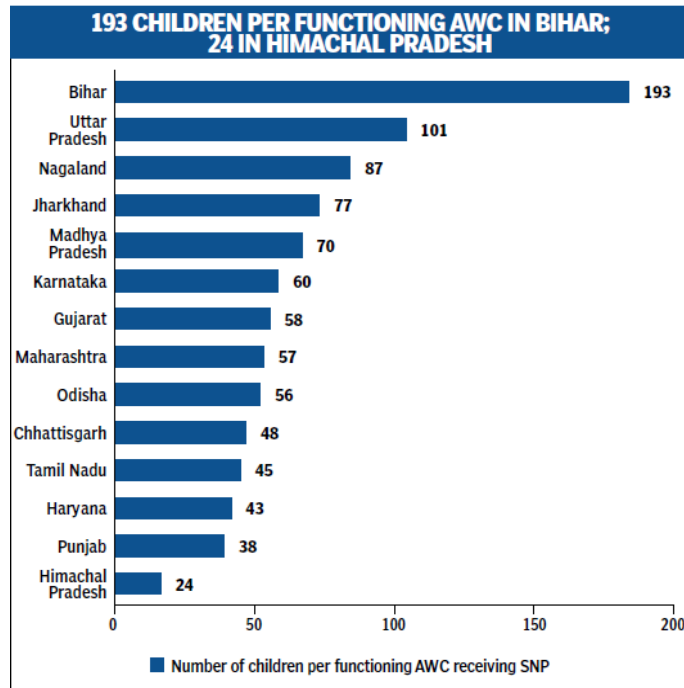

Aanganwadis were started by Government of India in 1975 as part of the Integrated Child Development Services program to combat child hunger and malnutrition.

A typical Aanganwadi centre provides basic health care in Indian villages. It is a part of the Indian public health care system.

Aanganwadis in India

As per press release by Ministry of Women and Child Development dated May 07, 2015, there were 13.42 Lakh operational Aanganwadis in India as on December 31, 2014. These Aanganwadis include 1,87,997 in Uttar Pradesh, 1,14,434 in West Bengal, 1,08,010 in Maharashtra, 91,677 in Bihar, 71,140 in Odisha and 64,518 in Karnataka among others.

Aanganwadi is the first point of service delivery for health, nutrition and early learning for children at the village level. There has been significant increase in the percentage of operational Aanganwadi centres from 10.4 Lakh in FY 2010 to 13.42 lakh as in FY 2014. Following snapshot gives us a brief idea of average no. of children per Aanganwadi centre in India;

Steps taken by Aanganwadis

Children malnourishment adversely affects physical and mental growth. Improper and inadequate diet results in poor growth of children. Aanganwadis run by Government aim to address this issue by improving the nutritional contents of food served to children enrolled here. Various State Governments have implemented various policies/schemes to improve health of children and women. Some of them are;

- Until FY 2014, 1,808 Aanganwadis in Trichy, Tamil Nadu lacked electronic weighing scales to monitor growth of children upto six months of age. During FY 2015, 1,808 machines were procured for the said purpose. Along with electronic weighing scales, Bar scales are also used to weigh children above six months of age.
- Introduced as a common **Mother and Child Protection Card**, under ICDS, weighing of children are being done every month and plotted in the WHO register and MCP Cards and nutritional status from the Growth Curve is assessed and measures are taken to reduce malnutrition. Growth Monitoring data for children 6 months to 3 years old reveal the progress being made in reducing the levels of underweight and malnourished children.
- Live SATCOM programs on nutrition and health practices for guiding district, block and aanganwadi staff and TV spots on private TV channels and Doordarshan between news and other popular programs.

Major Challenge faced by Aanganwadis

- Non-use of electronic weighing scale
- Lack of appropriate and adequate supplementary nutrition
- Delayed commencement of complementary feeding
- Referral to nutrition centres
- Ineffective communication by aanganwadi workers regarding under-nutrition and measures to overcome this
- Major gaps in Health Services:
- Lack of regular health checkups of children
- Inadequate referral for illness

Child Growth Monitoring Systems (CGMS)

Growth Monitoring (GM) is the process of following the growth rate of a child in comparison to a standard by periodic, frequent anthropometric measurements in order to assess growth adequacy and identify faltering early.

It is a measurement of a child to determine levels of malnutrition for a nutrition surveillance program; or for periodic nutrition assessment; or to screen a population to select or determine eligibility of children for food supplementation, therapeutic feeding, or other services.

Electronic Weighing Scales is proving effective because of following features;

1. Measuring actual weight.
2. Storing the weights in periodic records with name, time and date.
3. Plotting these weights on Growth Charts
4. Analyzing the nature of curves based on their slope.
5. Devising a plan to act according to the curve traced.
6. Easy to use and local language keyboard

Outcomes

The primary objective of ICDS is to reduce the nutrition gap among children between the age 0 to 6 years and pregnant and lactating mothers. This is being achieved by use of electronic weighing scales that are also referred as Child Growth Monitoring Systems. AWC workers are being provided with manuals to use these systems effectively and efficiently. This has resulted in decrease in malnutrition level.

Between March 2011 and March 2014, the malnourishment level amongst ICDS beneficiaries dropped by 13% points from 41% to 28%. Following snapshot gives a brief idea about the improvements in malnutrition level from 2011 to 2014;

- Rechargeable Battery
- Equipped with large ABS Bowl which can accommodate children ageing from 0 to 72 months.
- LED display with real time clock.
- User friendly local language keyboard.

Above mentioned features falls broadly in line with the requirements by various State government in electronic weighing machines.

Demand Prospects

As mentioned above, AWCs lack proper measures to weigh infants and children. Government aims to replace all the manual weighing scales with the electronic weighing scales (Child Growth Monitoring Systems). With Aanganwadis being set up in small villages and towns, this will lead to rise in no. of Aanganwadis and generation of good demand for electronic weighing scales.

There are 13.42 Lakh Aanganwadis as of December 2014 in India. As per the general requirement mentioned by the Government of India, there is a requirement of replacing approx. 15% machines per annum being used by Aanganwadis.

Considering a case where minimum 2 machines are required per Aanganwadi and approximate sale price of each machine is at ₹ 5,000/-, an estimation of demand generated can be computed as follows:

Particulars	Amt (INR Lakhs)
Aanganwadis as of December 31, 2014 (no. in lakhs)	13.42*
Average machines used per Aanganwadi	2
Total machines being used (no. in lakhs)	26.84
Replacement Criteria @ 15% (no. in lakhs)	4.03
Offer Price @ ₹ 5,000/-	5,000
Total potential demand generated per annum	20,150

**Data related to Aanganwadis is as of December 31, 2014. Due to rising population, government's thrust on increase the health quotient of the population and to reduce load per Aanganwadi in certain states, the No. of Aanganwadis are expected to increase every year. With increase in no. of Aanganwadis, demand arising from them is also expected to increase.*

Our Sales

For the period ended September 30, 2016 our sales to Government and Institutional segment stood at approx ₹ 2300 lakhs, which is about 58% of the sales achieved during the 6 months period.

Nitiraj Engineers Limited is already supplying machines to various state governments under ICDS program. These machines have advanced technology support in form of data collection, plotting, MIS and real time dissemination. With the help of technology the task of record keeping, plotting, data management and reporting can be handled by the weighing machine systems itself. This provides the field staff and supervisory staff to focus on actual action points to achieve objectives of ICDS rather than spending time on data management. We expect the demand of this segment for our Company to sustain and grow in the coming years.

Considering quality of the products, timely supply and prompt services, Director General of Supplies & Disposals (DGS&D), Government of India, has consistently awarded us the Rate contract since 2006. We have successfully executed bulk Purchase orders from Central Government departments like Defence, Railways, Postal and State Governments' Home Ministry, ICDS, Education, Health, Food & Civil Supplies etc.

Manufacturing process

We are engaged in Design, Manufacture and Marketing of Electronics Weighing Scale and Systems, Currency Counting Machine for counting of Indian Currency and Electronic Auto/Taxi Meter.

All manufacturing process takes place as per the approval accorded by the Director of legal Metrology, and in conformity with the provisions of the Standard of weight and Measurement Act 1976, and also with the Standard of weight and measurement Rules 1987. The manufacturing process and the technical knowhow used by the company are indigenous, and the process has improved and become more efficient over time. Plant and machineries and Testing Equipment are used for production and testing of stores respectively. The quality objectives are communicated to all the employees and quality checks are performed to check adherence to these objectives. These policies regarding quality are also reviewed periodically in the Management Review Meeting.

The above flowchart shows us that the incoming raw material is received by the 'Material Receiving Department'. They transfer these materials to the 'Inward Inspection Department'. This department tests the material as per the quality plan and deposit the same with the 'Store Department' if the materials pass the quality test. If not, it is returned to the supplier through the 'Suppliers Department'. There are two main components of the product manufactured simultaneously, the PCB and the S.S. trays. There are then combined together at a later manufacturing stage.

The blank PCB is populated with various components, and then soldered on a soldering machine. Then this soldered PCB is cleaned in an ultra sonic cleaner and then baked in the oven. After that it is again put through another quality test. If the PCB does not pass the test, the reasons for rejections are found. If it is found to be faulty due to the raw materials used, it is again given to the 'Supplier Department' to return it to the suppliers. If the PCB is faulty because of mishandling, it is immediately disposed off. Eventually, after the quality test, the transformers, PCB, power cord and fuse are assembled together.

Simultaneously while assembling is happening on the PCB, the company also works on S.S trays. They first cut the M.S pipes and weld them, so that frames of platform scales are manufactured. Similar to the PCB, these frames are put through the quality control procedures. The ones that clear the test are drilled and given for powder coating. Then these S.S. sheets are cut on power shearing machines, punched through power press machine and finally bent through the power press brake. Eventually welding of the tray takes place using Tig welding machines. Then these trays are buffed for a good shine.

After both the PCB and the S.S. trays are prepared they are combined and assembled together. The loaded cell is mounted on the metal frames. Correct corner errors are adjusted for overload protection with the help of standard weights. Then the entire scale is put through the quality test as per quality plan. For this the scales are kept 'on' for two hours for burning in. If they do not pass the test they are given to the 'Model Rework Department' to diagnose and rectify the issue. The ones that clear the quality test are packaged by the 'Packaging Department' and transferred to the finished goods store. These units are dispatched as and when orders are placed.

b. Factors that may affect Results of Operations

Points mentioned in the Risk Factors given in this Offer Document and other important factors could cause actual results to differ materially from the expectations including among others:

- **General economic and business conditions;**

As a company operating in India, we are affected by the general economic conditions in the country. The Indian economy has grown over the past several years. This improved performance was propelled by the growth in industrial activity due to liberal policies adopted by the Government of India promoting small and medium enterprises and increasing their contribution to GDP. The growth prospects of the business of our Company and our ability to implement the strategies will also be influenced by the macro economic growth.

- **Our ability to successfully implement our strategy and growth and expansion plans;**
Our growth plans are extensive and would put significant demands on our management team and other resources. Any delay in implementation of our strategy and growth and expansion plans could impact our Company's roll out schedules and cause cost and time over runs.
- **Factors affecting industrial activity;**
We enjoy certain tax benefits as our manufacturing facilities are situated in specified locations in Himachal Pradesh. Any change in the factors such as industrial policies, tariffs, excise duties, locational advantages, fiscal incentives, duty exemptions etc may affect the activities and competitive scenario thereby affecting our results of operations.
- **Increasing competition in the industry;**
Weighing Scale Industry is characterised by few large scale organised players and many medium scale regional players. Weighing scales are used in various sectors such as transportation, jewellery, manufacturing industries, warehouses, retail markets etc. We have to compete with organized as well as unorganized sector on the basis of availability of product, product quality, product range and services. Further, there are relatively low entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. We face competition from other Companies like Devishree Mudran Pvt. Ltd. (*Dolphin*), Apple Weighinfra Limited, Precision Electronics Instrument Co. (Gold Tech), Sansui Electronics Pvt. Ltd. etc.
- **Cyclical or seasonal fluctuations in the operating results;**
We have a large client base ranging from individual to industries. Our Sales are based on the demands emanating from various user segments. The demand is spread throughout the year; however, there may be some periods where the demand is at peak. Thus, such changes in demand may influence our periodic operating results.
- **Changes in laws and regulations that apply to the industry;**
There are various laws and regulations applicable to our industry, in which we operate, that we have to comply/follow. These rules and regulations that we are bound to be compliant with tend to change over period of time. In case of a failure to comply with changing laws and regulations or to obtain or renew the necessary permits and approvals may adversely affect our business.
- **Change in Technology**
Technology is a driving factor that affects overall operations in manufacturing Industry. In order to achieve Company's objectives, we constantly need to upgrade and apply improved technology. We are continuously emphasizing on significant upgradation of manufacturing facility to improve product quality and turnaround time. We are in the process of migrating to a new and improved ERP set up.
- **Changes in fiscal, economic or political conditions in India;**
External factors such as terrorist attacks, acts of war or geopolitical and social turmoil in India or certain parts of the world could constrain our ability to do business, increase the costs and negatively affect our financial performance.
- **Changes in the foreign exchange control regulations, interest rates and tax laws in India.**
Any change in the foreign exchange control regulation, interest rates and tax laws in India affects liquidity in the market which in turn affects the purchasing power of the economy.
- **Threat from Chinese Exporters**
Globalization has helped India to develop its Industries at a faster pace but it has also led to entry of foreign players in Indian Market. India imports various products from China that are used as raw material for manufacturing electronic products. We understand that entry of such players in our Industry to supply fully assembled weighing scales may lead to shift in demand due to inexpensive nature of Chinese products and machinery.

c. Outlook

The Company is committed to putting in continuous efforts for providing goods and services of superior quality with focus on innovation using best practices, adopt appropriate sales & marketing strategies and invest in people development through regular training and skill-upgradation programmes. Fundamental growth drivers of Indian Economy continue to exist. The overall scenario for economy is showing positive trends and we believe it will help our Industry to grow at a faster rate. We are confident of achieving consistently good performance by using better technologies and introducing better and improved products and services and augmenting our sales and marketing efforts, while improvising on internal systems and controls to keep costs under tight leash.

Future changes in relationship between costs and revenues, in case of events such as future increase in labour or material costs or prices that will cause a material change are known

Increase in the cost of the raw materials which we use for manufacturing the weighing machines, will affect the profitability of the company. Fiscal Incentives available to us due to location of our manufacturing facility at Parwanoo Himachal Pradesh are due to expire in March 2017. We are looking for alternative means of retaining the fiscal incentives by relocating our operations within Parwanoo or relocating to any other territory offering similar fiscal incentives. In case the fiscal incentives are not available to us in future it may impact our margins since we may not be able to pass on the increase in cost of our products to the customers in full. This demand from various clients is spread throughout the year; however, there may be some periods where the demand is at peak.
